Prepare and use only in well-ventilated environments. The attached insert contains important information on health and safety. Read the enclosed instructions completely before use. Do not use on relaxed hair. L'Oréal USA, Inc. See the instructions provided inside for details on how to get the look. Okay, seriously, what's wrong with the highlights at home? Being responsible for dyeing thin strands of hair on your own probably sounds scary, but it doesn't have to be. That's why there are highlighting kits at home. These comfortable dandy boxes are equipped with all the necessary items, including instructions. There OrAA©al Paris Frost & Design is one of these home highlighting kits that makes it as close as possible to highlight your hair by yourself. You're not convinced? Below we answer all your questions and share exactly how to use Frost & Design. Can you (really) highlight your hair at home? Let's repeat, yes! You can show off your hair at home. There is no rule that says you have to take time to see a coloring agent to get beautiful reflections. It's just about finding the right hair color kit at home to use. One of the options you have is L'Oréal's Frost & Design, which we are explaining how to use coming. Keep in mind that highlighting requires bleaching to lighten your hair, so if you start with a dark brown base shade, it might take quite a bit of work to get the blonde shade you want. How to use the L'Oréal's Frost & Design One of the biggest benefits of highlighting your hair? You have the opportunity to completely customize your look. The Frost & Design kit includes a highlighting cap that allows you to create perfectly positioned, precise and uniform lights. Follow the instructions included with the hair coloring kit at home to position your highlights. Then, once the dye is finished, use the toning rinse and conditioning cream provided with the kit. Your final look will be a delicious whirl of creamy reflections that give you a sun-kissed glow. How to take care of highlighted hair Do not spoil your newly highlighted hair by taking care of it in the wrong way. Your padlocks will need special post-tinting TLC work. So, once you've finished coloring your hair with Frost & Design by L'Oréal's Frost & Design, keep the following tips in mind. 1. Switch to a system of hair care products for colored hair. Hair with reflexes, or any hair dyed for that matter, require hair care products specially formulated for colored hair. Put away the old products sitting in the shower and exchange a new shampoo, balm and mask for hair. Try the L'Oréal's Paris Hair Expert Color Vibrancy Vibrancy Shampoo, the ORA © at Paris Hair Expert Color Vibrancy Intensive Conditioner, and OrA © at Paris Hair Expert Color Vibrancy Intensive Ultra Recovery Mask. Gently massage the shampoo in wet hair, then rinse. Follow with the air conditioner, leaving it for 1-2 minutes before rinsing. One or twice a week, use the mask instead of the air conditioner. Leave it on for 3-5 minutes before rinsing. 2. Lower the heat in the shower. Just hot showers! Super-Hot H20 can strip your hair of essential oils, which can let you feel dry and looking boring. Shower in warm water instead. 3. Rock aeronautical style. It's time to embrace the natural texture of your hair! Give your hair a pause from thermal styling and let your hair dry. After shower, dry the braids dry before applying a styling, mousse, or wave spray cream. Working OrA © at Paris Advanced Hairstyle Air Dry It Handone Style Cream, the Oré at Paris Advanced Hairstyle Air Dry It Ruffled Body Mousse, or the Oré at Paris Advanced Hairstyle Air Dry It Wave Swept Spray Through The hair, then let it end the drying of the air. Serious style sans heatâ € you can't beat this! 3. Get ready for retouching. One color will only last so long, even when you're doing your best to take care of your mane. At one point, you will need a touchup. When that time comes, be ready to go with another Box of Frost & Design at hand. In this way, even if you don't have time to run to the store, you won't have to be captured and about with unpleasant roots. In case you also need all the details on how to do your own color all-over, check our items, how to use Excellence CrA me and how to use Superior Preference. Important: Haircolor and bleaching contain ingredients that can cause allergies and / or other types of reactions. A skin allergy test is required 48 hours before each use of a hair color product. The fleas contain persulfates. High lifting fleas and hair shades cannot be used on relaxed hair; For other hair color shades, wait at least 14 days after whitening, relaxing or perming before coloring. This is a security summary. Read all the labeling and product instructions completely before use.
