We've got millions of parts, hundreds of brands, and thousands of stepbystep videos— everything you need to find it, fix it and finish the job right. It will help you assemble, prepare, maintain and safely operate your machine. Your outdoor power equipment was built to be operated according to the rules and instructions for safe operation which are contained in the operators manual and on the machine itself. Read and follow all instructions in the manual before attempting to operate your outdoor power equipment. As with any type of power equipment, carelessness or error on the part of the operator can result in serious injury. Your machine is capable of amputating hands and feet and throwing objects. Failure to observe the safety rules and instructions, both on the machine and in the Operators Manual, could result in serious injury or death. Due to the size of the Operators Manual, some Operators Manuals are broken down into two or more segments so that the entire Operators Manual can be downloaded easily. Its downright fun to transform it from a string trimmer to a mower and back. It handles everything I need it to in my small front and back yards and the whole unit is lighter than the string trimmer I used to have. In tight spots, I can just pick up the whole unit to turn it around rather than the three point turn I used to do with my very heavy reel mower. Its easy to hose down the mower dock after use. I love this thing!It is easy to push and control. It starts very easily. I am happy with it. There are some things I noticed that I would suggest some upgrades to it though. After 1 use on less than an acre lot, the plastic shroud has some damage on it now with a large hole in it. I had to replace the trimmer twine quite often. That was really fine as I had purchased the recommended companion item of a large spool of it. If I had not had the additional twine, I would have only used the trimmer for 10 minutes.

For 5 hours of trimming, I replaced the trimmer line about every 10 to 20 minutes.. full review Lets break it apart 1. Its expensive. Do you know of any single deWalt item that isnt priced higher than 70% of its counterparts. I feel this case is closed. No one buys deWalt because its cheaply priced 2. It should have come with flex volt or higher AH batteries. Wouldnt it be great if we.Its light, can do both trimming and edging, and has improved significantly over the previous model. The cordless concept gives you a lot of freedom. I have a corded edger with a blade and its great for the really challenging parts of the lawn, but nothing beats the convenience of this cordless model. How well does it trim. For a home with a front and back yard probably around 4000 sq ft lawn space I found the 3Ah battery just enough to cover both yards if using a judicious mix of the two power settings. The low power setting is fine for most of the trimming and even some of the edging, but I use the higher power setting for thicker growth. This is for St. Augustine grass common in the south. If you have harder substances to cut or if you need to use.With the draw string you can tighten it up if needed.I bought this because it could fit with any weed whacker. It easily was attached to my weed whacker and I was able to do my whole area without backache and twisted knee. The job became pleasurable. I would recommend this to anyone.Pipe comes out different side from stock but still works. Neighbors live the fix. Dont forget a new gasket!Correct thickness for my Craftsman mower.Took a few minutes to get the straps adjusted correctly for me, it sreduce more weight for my shoulder, and this widen strap makes my shoulder for comfortable. Should have thought of this sooner. Really eases muscle strain, sore shoulder, and stiff neck.A 17 yr old used the mower and did not realize the filter had blown off dog carried off filter. He cut grass and evidently the dust pulled through.

www.norestim.ro/wp-content/plugins/formcraft/file-upload/server/content/files/162720a635f9c7---bravilor-bonamat-b20-manual.pdf

When cranked again the mower was smoking. A small engine mechanic said the dust has scarred the cylinder and that it might last a cutting or two. Under the circumstances of there being a problem with the filter and cover being blown off could you warranty this mower. I need to know soon, if not, it looks like I will need to purchase a new mower. Thank you for the consideration. Linda I had a lawn boy years ago and loved it, the mower lasted for years. We moved and had a bigger yard.Get

the harness adjusted before you hang anything on it. Once you do it holds the weight well and distributes it evenly. I had a 50cc brush cutter hanging off of this and barely even felt it. If you want NextDay, we can save the other items for later. Order by, and we can deliver your NextDay items by.
