Register a free business account To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. The Craftsman trademark was registered by Sears on May 20, 1927. A variety of companies manufactured tools for Sears under the Craftsman name. The known makers of woodworking machines, metalworking machines, engines, motors and vises are listed below. Companion tools were less expensive than the contemporaneous Craftsman tools. It was replaced by the Dunlap name in 1941. Interestingly, in 1998 Sears applied for a trademark on the Companion name, for use in on a vast list of products. Some older Dunlap machines were still good quality, and remain very good values.Here is a list of known North Americanbased makers of their machinery with their modelnumber prefixes some companies do not have a modelnumber prefix because they manufactured for Sears before they introduced the prefix system Of course, Sears sells an enormous variety of products that are outside the scope of this site. We solely cover woodworking and metalworking machinery plus the engines and motors that powered them, and of those we only cover products made in USA, Canada and the UK. Sears also used the Companion, Dunlap, and Fulton names.

In Canada, the Craftsman name was also used by SimpsonsSears Ltd.The store sold them to Richard W. Sears, a local telegraph operator, who sold them to railway workers for a profit. Sears realized that there was a good market for this service, and started the R. W. Sears Watch Co. He relocated to Chicago in 1887, and found a partner, watch repairman, Alvah C. Roebuck. In 1893 the company was renamed to Sears, Roebuck and Co. Sears, Roebuck expanded rapidly in the 1890s because of their catalog sales, especially to farmers. In 1925 they opened their first retail store. By 1933 they had 400 stores. In 1927, Sears hired Arthur Barrows to head the companys Hardware Department. Barrows knew hardware and wanted to create a brand name for Sears hardware that distinguished

it from other manufacturers. Dunlap immediately upgraded the quality of the tools. He threw out all the big, clumsy, cheap, castiron hammers and wrenches, and the soft screwdrivers that were hangovers from the days when farmers were the companys biggest customers. Dunlap recognized that America had moved into the automobile age and that Sears needed a line of high quality tools to meet this new demand. He decided to improve the look of Craftsman tools by adding chrome plate to improve the finish, color, and trim on wrenches and sockets, and high impact plastic handles on screwdrivers. Still, it may take some effort to track down what you are looking for, and if your machine is especially old preWWII or obscure then you may be unsuccessful. The list below contains suggestions on where to look. Just put in your model number into the search box and search. Call the Sears Parts Line, 18004694663, and have your model number ready. This is completely free, including shipping. Earlier Sears manufacturer lists incorrectly identified these makers.

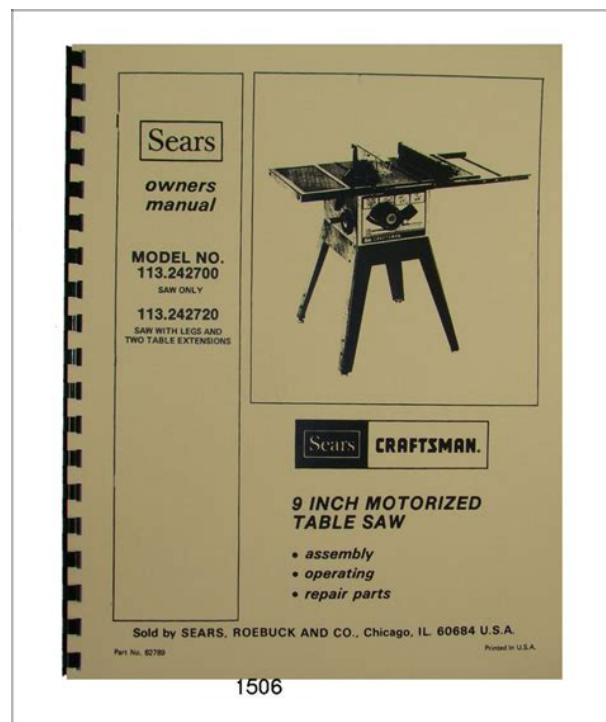

<https://labroclub.ru/blog/boss-me-70-manual-portugues-pdf>

Brian Kachadurian was the one who nailed down both makers, based on a comparison of Searsbadged motors and grinders compared to products known to have been manufactured by Sunlight and Delco. In the case of Sunlight, OWWM contributor Jeff Wilson provided a key piece of evidence in the form of a patent number on a Companion bench grinder that is identical to a later model with modelnumber prefix 115. SKF confirmed that an oddsized SKF bearing used in one of those 551 motors was made exclusively for Leland. Thanks to Brian Kachadurian for making this connection. VintageMachinery.org does not provide support or parts for any machinesPlease remember that safety standards haveIt is up to the individual user to useThe VintageMachinery.org. CLEANED Every page of every manual. Hi, I'm Ray. I've been in the woodworking business for over forty years. Twenty years ago, I decided to go into metalworking as well, in order to make the machinery and jigs that my woodworking required. Since then, I've accumulated many different machines, along with their manuals.

<https://www.merzigerbrauhaus.de/images/collins-r-390-manual.pdf>

As a selftaught craftsman, I've frequently needed manuals and books to help myself set up or operate complicated machines. That is why I started this service with my family to make hardtofind manuals easier for other craftsmen to obtain. I wanted to make the best quality, printed manuals to work with in a shop. After all, I remember the day when they didn't even have computers. We do More than Sell Manuals My son and I do metal and woodworking in our shop. We make some of the smallest inlay in the world. The duck call pictured has over 1,117 individual pieces of wood in it. You can learn more about our shop on our About Us page, or Ozarkwoodworker.com. We also try to help others identify their machines, and share some of the knowledge we've received over the years of experience with rebuilding machines for our shop. That is why we started Ozark Shop Talk Blog to give back to the many people that have helped us learn. We are selftaught machinist and woodworkers, and we had to use the HowTo Books, and information in the manuals to learn ourselves. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with Sears Table Saw Manual Download. To get started finding Sears Table Saw Manual Download, you are right to find our website which has a comprehensive collection of manuals listed. Our library is the biggest of these that have literally hundreds of thousands of different products represented. I get my most wanted eBook Many thanks If there is a survey it only takes 5 minutes, try any survey which works for you. Without a doubt, the older Craftsman table saws are decent tools and are considerably better than my little Delta contractor saw. For one, the Craftsman has a more powerful motor, allowing the saw to support using a dado stack. The short of it is that the saw has the potential to be a nice addition to my shop. At first glance this saw looks a little like a rust bucket, but looks can be deceiving.

Part No. 137218040001

A quick internet search is often all you need. This particular machine seems to be in great condition — either hardly used or well taken care of. This one has an external motor, making the inspection of the guts even easier. On the outside, two of the casters are broken and there is plenty of rust. On the inside some saw dust, very little rust, an old belt and a pulley that is installed backwards. All in all, there is very little for me to do. Replace a few things, fix a couple others. Refer to the manual to know what to use and where to use it. This particular machine takes 20 or 30 weight oil on the screws and joints. This may sound obvious, but you might be surprised what you discover. In this case, I found that the previous owner never achieved a square cut due to a pulley being backwards and rubbing against the table frame. I also found that the table saw fence is a piece of junk. I'll replace that one of these days. It simply will not easily set parallel to the blade. Here's how I clean it. I vac the loose rust from the surface and followed that with a green pad and some vinegar. Vinegar and steel chemically react, so I leave the vinegar on the table for 30 minutes or so, scrub with the pad and wipe off the extra. When the surface is dry, I clean it with mineral spirits. Over the course of 3 days, I do this 4 or 5 times. Then I wax. The reason I don't use any sort of grinder or sanding abrasive is that I don't want to make and low spots in the table top if I can help it. This is pretty much as far as I'm going with this particular machine. Something went wrong. Learn more opens in a new window or tab This amount is subject to change until you make payment. access to our ebooks online or by storing it on your computer, you have convenient answers with Craftsman 10 Table Saw Owners Manual. To get started finding Craftsman 10 Table Saw Owners Manual, you are right to find our website which has a comprehensive collection of manuals listed. You can use a multimeter to test tool and appliance cords and switches, the two parts usually responsible for electri. It also describes information tools available at eReplacementParts.com. Also, the blade guard assembly. I saw the not about the mitre gauge. I just bought one of these saws from an individual and these accessories were missing. Hoping to buy the complete assemblies without buying the individual parts to build them. Thanks. The manufacture has also discontinued some of the parts for both items also. WJA Just look through all the manufactures saws and pick out the on that would do best for you. Hope this helped, WJA But we dont have the owners manual available.
